SUMMARY

Computer Engineering graduate (September 2026) with hands-on experience in software QA test automation and data analysis. Wrote automated tests with Playwright and BugBug for Magento, Shopify and WordPress e-commerce sites, and built analyses and dashboards in Python, SQL, Excel and Tableau. Seeking an entry-level Data Analyst or Software QA role.

TECHNICAL SKILLS

Data & Analytics: Python (Pandas, Matplotlib), SQL, Excel, Tableau, PowerBI
QA & Testing: Playwright, BugBug, automated test scripting, bug reporting and tracking
Development: JavaScript, TypeScript, Java, HTML/CSS, Next.js, Tailwind CSS, Electron.js
Tools: Git, Linux, VS Code, Figma, Vercel, Microsoft Office

EXPERIENCE

Software QA Intern | 1902 Software Development, Alabang, Philippines *April 2026*

- Wrote and ran automated test scripts for web applications using Playwright and BugBug.
- Tested e-commerce platforms built on Magento, Shopify and WordPress, including AI-powered plugins and integrations.
- Identified, documented and tracked bugs, then worked with developers to confirm fixes across multiple environments.
- Used Git for version control within the team's development and QA workflow.

PROJECTS

Wage Growth and Inflation Analysis | Python, Pandas, Matplotlib *October 2026*

- Analyzed U.S. wage growth, inflation and real purchasing power after 2020.
- Cleaned and processed economic data with Pandas and applied statistical analysis to track changes over time.
- Built Matplotlib visualizations that show the trends and relationships clearly.

Global COVID-19 Data Analysis and Dashboard | Excel, SQL, Tableau *September 2026*

- Analyzed global COVID-19 data to find trends, case distributions and mortality rates across countries.
- Cleaned and prepared datasets in Excel and SQL for visualization.
- Built interactive Tableau dashboards that present key findings.

Guardian Vision: Gesture-Based Monitoring in Video Surveillance | Capstone *2025 – 2026*

Project Planner, UI/UX Designer, Front-End Developer

- Planned milestones, deliverables and testing phases for a system that detects, timestamps and stores security-relevant events from video feeds.
- Designed the UI and an alert-driven review workflow that surfaces significant events instead of raw continuous footage.
- Structured and documented event data so each incident is clear and traceable.

Bana: Bill Splitter Web App | Next.js, TypeScript, Tailwind CSS, Vercel *July 2026*

- Built a responsive web app that splits group bills into individually itemized receipts.
- Added printable and shareable receipt summaries for each participant, and deployed on Vercel.

Wine Quality Classification System | Python, Pandas, Matplotlib *May 2025*

- Built a classification model that predicts wine quality from physicochemical attributes.
- Handled preprocessing, feature analysis and model evaluation, and documented the findings.

EDUCATION

National University – Manila, Sampaloc, Manila *Aug 2022 – Sep 2026*

Bachelor of Science in Computer Engineering

Relevant coursework: Data Analytics, Data Science, Database Management, Software Engineering, Artificial Intelligence, Data Structures and Algorithms, Operating Systems

CERTIFICATIONS

Google AI Professional Certificate, Google *August 2026*

CC Certified in Cybersecurity, ISC2 *March 2026*

AWS Cloud Practitioner Essentials, Amazon Web Services *March 2026*

LEADERSHIP

Associate Director for Visual and Creatives | BarkStudio, National University – Manila *2024 – 2026*

- Led the Visuals and Creatives team: planned deliverables, assigned tasks and met tight event deadlines.
- Produced publication materials for UAAP-related coverage that required accuracy and fast turnaround.
